

Programmed Instruction in the Light of Anticipated Computer Technology (Classic Reprint)

By Zenon S Zannetos

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Programmed Instruction in the Light of Anticipated Computer Technology During the past several years, I have been experimenting with programmed instruction in the area of managerial accounting. I have attempted to program certain basic fundamentals of accounting in order to relieve our basic managerial accounting course of a lot of prerequisites and therefore introduce some more advanced material. After extensive analysis of the results and after three revisions of the program, I am convinced that programmed instruction can play a significant educational role in our schools. The results strongly suggest that, through programmed learning techniques, the time required by the students to learn a given amount of material can be extensively cut and not impair retention. In fact if anything it appears that overall performance is improved. The rate of experimentation and introduction of new techniques in the field of education has not been very spectacular. With programmed instruction in particular, most of the potential remains to be exploited. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more...
